REUSE INCENTIVE

WORKING GROUP MEETING #3

THURSDAY, MARCH 19, 2026

LICENSING AS INFRASTRUCTURE FOR OPEN SCIENCE

AGENDA

1. Welcome and Agenda Overview
2. Icebreaker: Member Intros
3. Recaps: Working Group Goals, Open Licensing with CC BY, and the Modular Paper Repo
4. Activity: Naming Citation NEeds
5. Breakouts: Solutions + Incentives
6. Next Steps

ICEBREAKER: MEMBER INTROS

Breakout groups - pair up and share.
When you come back, drop your answer in the chat!

- Choose a superpower: Time travel but only to past times you've personally experienced, or teleportation but only to places you've personally been to.
- Where will you go first?

WORKING GROUP

Matthew Akamatsu
Asst. Professor & Co-founder
University of Washington & Discourse Graphs Project

Tony Alves
SVP, Product Management
HighWire Press

Alex Argüelles
Technologist
comun.al

Femi Arogundade
Open Science Community Manager, WACREN

Courtney Babott
Co-founder, Continuous Science Foundation

Maria Bagonis
Data and Technology Advancement Scholar / Senior Research Fellow, NIH

Taylor Campbell
Open Science
Creative Commons

Jonny Coates
Executive Director
Rippling Ideas

Rowan Cockett
Co-founder, Continuous Science Foundation

Simon Duerr
Assistant Professor
HES-SO Valais-Wallis

Mathïs Fédérico
Founder
Bycelium

Matthew Giampoala
Vice President, Publications
American Geophysical Union

Torsten Goerke
TU Dresden Center for Open Digital Innovation and Participation (CODIP)

Josh Gottesman
Michael J Fox Foundation

Monica Granados
Director, Open Science
Creative Commons

Ebony Gunwhy
PhD Researcher
The University of Sheffield, United Kingdom

David Lang
Executive Director
Experiment Foundation

John Laver
Postdoctoral Fellow
Dept of Cell and Systems Biology, University of Toronto

Ryan Marien
Head of Legal
BioRender

Michael Markie
Head of Innovation Initiatives
eLife

Rodrigo Migueles Ramirez
Graduating PhD Student
McGill University

Anton Molina
Director
Open Source Ecosystem

Sharon Newman
Systems Lead
b.next

Dylan Roskams-Edris
Advisory Services Lead
Conscience

Brian Rose
Associate Professor
University at Albany (SUNY)

Jonathan Starr
ED, Open Source Endowment; *PM*, NumFOCUS; *Co-founder,* SciOS & IOSP; *PM*, DeSci Labs

Alex Talsma
Open Source, Data, and AI
Microsoft

Ronen Tamari
Co-founder
Cosmik Network

Sam Teplitzky
Open Science Librarian
UC Berkeley

Hao Ye
Curriculum Lead
Community for Rigor
University of Pennsylvania

RECAP: WORKING GROUP GOALS

1. **Surface points of friction around reuse and licensing of modular research** (TODAY'S FOCUS)

2. Explore how licensing serves as a technical and cultural enabler of reuse in modular research

3. Produce a document with a framework and recommendations for modular science reuse

RECAP: OPEN LICENSING WITH CC BY

The only requirement for reuse is **Attribution (BY)**.
Credit must be given to you, the creator.

RECAP: THE MODULAR PAPER REPO

Paper repo (PR) is made of a collection of objects, which is shareable as an object.

PR is made of claims/hypothesis headlines: containers of **panels of evidence (PE)**.

PE supports its claim with **text, figures, and tables,** as an embed or as its own PDF.

PE contains **panel dependencies (PD)**, with Code, Research Datasets, Design Files, or Lab Notes.

Researchers can then publish the entire paper repo as a **PDF Paper** (but not the dependencies, which can just be linked out).

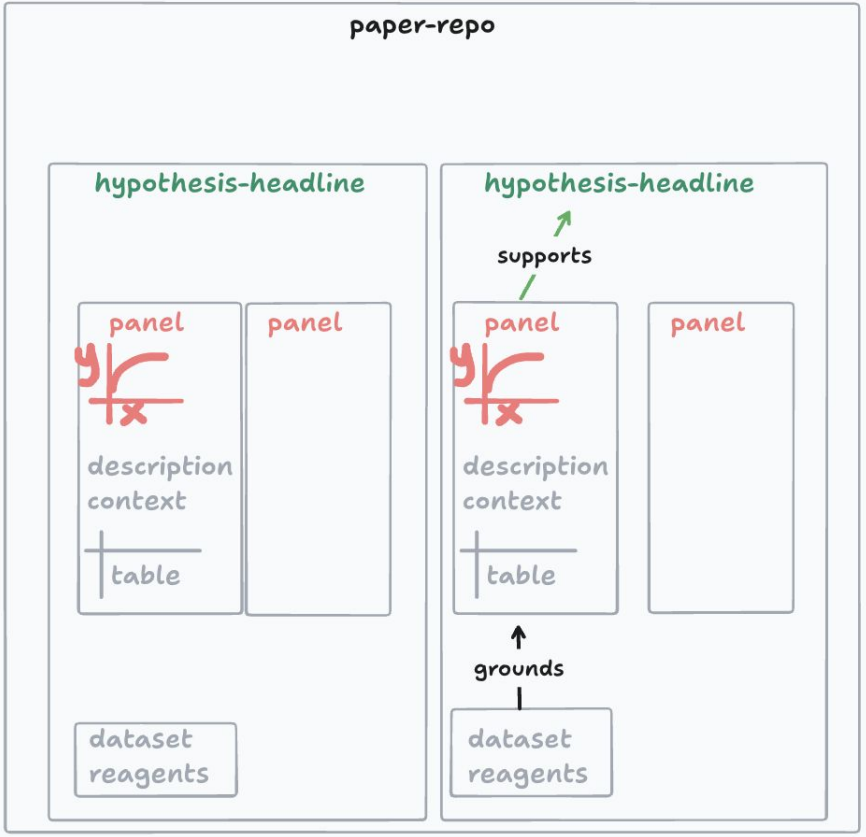

Figure by Matthew Akamatsu, 2025

ACTIVITY: NAMING REUSE NEEDS

GREEN
PUBLISHING FOR REUSE

People need to know IF and HOW they can reuse a component as a primary source

People need to know IF and HOW they can license their components

People need to know WHAT they must do to properly license their components

BLUE
SETTING ATTRIBUTION EXPECTATIONS

People need a way to track attribution/credit received as an author

People need a way to distinguish attributions/citations received for components vs. PEs vs PRs

People need a way to distinguish attributions/citations received for primary vs secondary sources

PINK
REUSER GUIDANCE

People need to know WHAT the license is requiring them to do in order to reuse the component

People need a way to easily do what the license is requiring

People need a way to track if they did what the license required of them as a reuse

YELLOW
THINKING OUTSIDE OF THE PDF

People need a way to prevent harmful gaming of attributions/citations

People need a formal research environment/standard protocol for easily modular publishing of Paper Repos, Panels of Evidence, and components, with outputs interoperable across platforms.

People need attribution options during informal sharing as well

ACTIVITY: NAMING REUSE NEEDS

1. What needs can be added or changed on this list, so that it is decently comprehensive?

2. What needs should be considered for sharing authors? Reusing researchers? Repository owners? Hosting institutions? Technical developers? The general read-only public?

3. Which of these needs feels most urgent or familiar to you in your work, and why?

BREAKOUTS: SOLUTIONS + INCENTIVES

Pick a group and discuss

GREEN PUBLISHING FOR REUSE, BLUE SETTING ATTRIBUTION EXPECTATIONS, PINK REUSER GUIDANCE, or YELLOW THINKING OUTSIDE OF THE PDF

Our stakeholder groups are:
Sharing authors | Reusing researchers | Repository owners
Hosting institutions | Technical developers
The general read-only public

1. What would be an ideal solution to these needs for them?

2. What would motivate participation by these various stakeholder groups?
